

Fees

- ö PaySchools charges one flat rate per transaction.
- ö There are no setup charges, no administrative charges, no licensing fees.
- ö No returned check or charge back fees are passed on to the district.

Technical Requirements

- ö The district does not need to make any investment in new technology.
- ö PaySchools will integrate into most existing lunch room point of sale applications at no additional cost.
- ö Parents access their PaySchools account exclusively through the district's website, increasing the district's visibility.

Set-Up

- ö A complete shopping cart function is provided allowing the district to make an unlimited number of products and services available for on-line purchase -- not just school lunch payments.
- ö PaySchools creates office efficiency – less manual check processing, less handling of cash and fewer bounced checks.
- ö Customer service is provided by PaySchools to the district via a toll-free number.

Reporting Functions

- ö Complete transaction reporting available to the district.
- ö The district can pull reports at any time and customize reports by category, product, date range and customer name.
- ö Report information is easily uploaded into the district's financial software.

Notification

- ö E-Mail notifications sent to designated district representative when a transaction is processed relevant to their department.
- ö Parents receive e-mail notification confirming deposits and have access to their complete transaction history online.

Deposits

- ö Daily deposits are made into the district's designated bank account, with complete breakdown of category and product totals for accounting purposes.

Security

- ö PaySchools ensures secure, safe transactions.
- ö Credit card and checking account information is not stored, and that information is not visible to PaySchools or the district at any time.
